

## Porcelanic Pigments for Dry Colouring

	CODE	DESCRIPTION	CHEMICAL BASE
	PG-71050	TURQUOISE BLUE	Zr-V-Si
	PG-71051	COBALT BLUE	Co-Al-Zn
	PG-71054	COBALT BLUE	Co-Al-Zn
	PG-72050	ORANGE	Ti-Sb-Cr
	PG-72059	YELLOW	Zr-Pr-Si
	PG-73050	PINK	Al-Mn
	PG-73053	RED	Fe-Si
	PG-74050	BLACK	Fe-Cr
	PG-74051	BLACK	Fe-Cr
	PG-75050	GREEN	Cr-Al
	PG-75051	BLUISH GREEN	Cr-Co-Al-Zn
	PG-76050	SIENA BROWN	Ti-W-Cr
	PG-76051	COFFEE BROWN	Fe-Cr
	PG-76053	REDDISH BROWN	Fe-Cr
	PG-77050	GREY	Fe-Cr

In order to obtain an optimal stability and reproduction in the colours it is essential to have the correct combination of the chemical elements which make the glaze and the colouring pigment. The information and instruction contained in this catalogue are based in our present knowledge and experience at the laboratory level at the time of publishing. The use or application of this information and instruction are at the users' discretion, and does not imply any responsibility on COLOROBIA's side.
